

PREVENT CERVICAL CANCER

DIE EERSTE RONDTE MENSLIKE PAPILLOOMVIRUS (MPV) VELD TOEG IS

05 FEBRUARIE - 15 MARCH 2019

Die teikengroep vir die 1ste rondte van 2019 sluit in:

- Graad 4 meisies 9 jaar en ouer in openbare skole.
- Meisies 9 jaar in spesiale skole.
- Eerste dosis sal toegedien word.

Alle meisies wat teen MPV ingeënt word, sal beskerm word teen infeksies wat tot Servikale kanker kan lei.

Ouers of voogde moet toestemming gee vir meisies om ingeënt te word.

DIE BESKERMING IS VIR JONG MEISIES, DIE TOEKOMSTIGE VROUE VAN SUID AFRIKA

FIRST ROUND OF HUMAN PAPILLOMA VIRUS (HPV) CAMPAIGN

05 FEBRUARY - 15 MARCH 2019

The target group for the 1st round 2019 include:

- Grade 4 girls, 9 years and older in all public schools.
- All girls who are 9 years in all special schools.
- Dose one will be administered only.

All girls vaccinated against HPV will be protected from infection that may lead to Cancer of the Cervix.

Parents or Guardians need to provide signed consent for the vaccination of the girls.
